

Dear Patty

I wanted to take the time to write this note to let you know what an exceptional job Stephen is doing for O2Planet. In our industry, as business grows, customer service is usually the first thing to go. I decided to make sure that never happens with O2zone and I can see you've made sure it doesn't happen with O2Planet.

When I approached Stephen about private labeling the canned oxygen, he went above and beyond to make sure I knew about the other products as well. For the past 6 months I've been trying to piece together my product line and it became a tedious task. I hadn't had time to browse your new site and overlooked the Nutricuticles. My dream was to be able to offer EVERYTHING OXYGEN from the oxygen lounges to supplements. O2Planet has everything I dreamed of and more.

I started taking the digestive enzymes which work better than the usual organic supplement I use. Also, the activated oxygen seems to be the future of O2. I feel better having added this, than just doing oxygen alone. For me Oxygen isn't a job, it's a lifestyle. I see that I am following in your footsteps and only hope I can do the stellar job you've done for this industry. I digress...

My trip to Ft Lauderdale was more than worth it. It was exciting to help out with the shoot but what was more exciting is the training day Stephen put together for me. He took me through an introduction of all the products as well as the equipment. I was able to see all the products and sample each individually. I ended up going shopping!!! It was my own personal oxygen experience.

It was amazing how much he and I work the same way, I guess it's the cancer in us! He even went as far as to help me tweak my business plan. It was just an odd coincidence that I was in the presence of a financial planner AND oxygen expert. The advice he offered was priceless and made the trip even more worth it. We discussed how our companies would work together and the future of oxygen. It was the perfect way to start a mutually beneficial relationship.

It isn't every day that I can freely talk to someone that understands my oxygen jargon and actually knows the industry as well, if not better, than me. I look forward to doing a lot of business together and pushing our industry to new heights. Thank you for doing what you do, Patty. The trip was confirmation that I'm doing the right thing at the right time. If I can follow in your footsteps to be successful and make a difference, then I'm doing a good job.

Feel free to call on me if you need anything, anytime. I look forward to chatting more in the future.

Warm Regards and Happy Breathing!

Missy Irwin
